

Site Register

WASHINGTON STATE DEPARTMENT OF ECOLOGY TOXICS CLEANUP PROGRAM

FEBRUARY 28, 2008

The Site Register is published every two weeks to inform you about public comment periods, public meetings, hearings, and other information related to the study and cleanup of hazardous waste sites under the Model Toxics Control Act, Chapter 70.105D RCW.

You may also find information about public hearings, meetings, workshops, and open public comment periods on Ecology's web page. Go to www.ecy.wa.gov and click on the Public Involvement Calendar.

If you have questions or want to be added to the mailing list (electronic or paper) for the Site Register, contact Linda Thompson at 360/407-6069 or e-mail Ltho461@ecy.wa.gov. Specific regional contacts are listed after each entry.

If you need this publication in an alternate format, please call the Toxics Cleanup Program at 360/407-7170. Persons with hearing loss may call 711 for Washington Relay Service. Persons with a speech disability may call 877/833-6341.

FORMAL CLEANUPS

Ecology oversees complex cleanup sites to ensure that your health and that of the environment are protected.

BENTON COUNTY

US Ecology, Inc., 23 miles northwest of Richland on the Hanford Site Facility Site ID# 311

Public comment period:
3/14/08 - 4/14/08

Agreed Order/Consent Decree

Ecology has an agreed order with US Ecology, Inc., to conduct a remedial investigation and focused feasibility study to identify the nature and extent of hazardous chemical contamination at its low-level radioactive waste disposal facility. US Ecology's contractor has prepared a public participation plan for this work as a requirement under the agreed order.

The draft public participation plan is available for review at the following locations:

- Richland Public Library, 1270 Lee Boulevard, Richland [509/942-7446](tel:5099427446)
- Hanford Information Repositories website at www.Hanford.gov (Click the Hanford Info Repositories link.)
- Ecology's Nuclear Waste Program, Richland, WA. (Please call [509-372-7920](tel:5093727920) for an appointment.)
- Ecology's website at www.ecy.wa.gov/programs/nwp/commentperiods.htm
- Ecology's Public Involvement Calendar: www.ecy.wa.gov

For more information, please contact **Jennifer Ollero**, Site Manager, at the Ecology address listed above or at [509/372-7988](tel:5093727988) or e-mail Joll461@ecy.

GRANT COUNTY

Grant County PUD Diesel Generating Facility, 9422 Tyndall Road NE, Moses Lake Facility Site ID# 9349375

Public comment period:
1/30/08 – 2/29/08

Proposed Delisting from Hazardous Sites List

Ecology invites you to comment on the proposed removal of the Grant County PUD Diesel Generating Facility site from the Hazardous Sites List.

The Hazardous Sites List is a list of contaminated sites throughout the state that are ranked on a scale of one to five. One represents the greatest potential threat to human health and the environment; five the least potential threat. The site ranked a five.

The Grant County PUD was preparing generators for an air quality test in May 2004. As part of the preparation, fuel was sent into pipes that supplied the generators. During the fueling, pipes located in an underground concrete vault leaked. Within an hour of beginning the fueling process, a spill was noticed and the system was shut down. It appeared the leak occurred where the pipeline first went underground between the two banks of generators on the northeast side of the facility.

Contractors removed more than 1,200 yards of diesel-contaminated soil from the site after the spill in May 2004. Concrete pads that two generators sat on also were removed. As a result of the

cleanup, the site is now considered ready for removal from Ecology's Hazardous Sites List. Groundwater was not impacted by the spill.

Ecology proposes removing the Grant County PUD Diesel Generating Facility from the Hazardous Site List based upon the following:

- Review of independent cleanup reports submitted to Ecology.
- Supporting documentation.
- Work completed at the site meets state cleanup requirements.

Documents related to the site may be reviewed at the WA Department of Ecology, Eastern Regional Office, 4601 N. Monroe, Spokane, WA 99205-1295

For more information or to submit written comments, please contact **Ms. Patti Carter**, Site Manager, at the Ecology address listed above or at **509/329-3522** or e-mail **Paca461@ecy.wa.gov**.

KING COUNTY

Blaser Die Casting, 5700 3rd Ave., Seattle
Facility Site ID# 7118747

Public comment period:
1/31/08 - 3/1/08

Enforcement Order

Blaser is associated with property in south Seattle where a release of a hazardous substance has occurred with subsequent contamination of soil and groundwater. Blaser is located several blocks downgradient of the Philip Services Corporation Georgetown facility and about one block south of the Art Brass Plating site. Groundwater contamination associated with releases

from the PSC facility and other sources is present in the general area.

Documents related to the cleanup are available for public review at:

- Ecology Northwest Regional Office, 3190 160th Ave. SE, Bellevue, WA 98008-5482. (Please call **425/649-7190** for an appointment.)
- Ecology's website at <http://www.ecy.wa.gov/programs/hwtr/foia/index.html>

For more information or to submit written comments, please contact **Ed Jones**, Site Manager, at the Ecology address listed above or at **425/649-4449** or e-mail **Ejon461@ecy.wa.gov**.

Seattle-Tacoma International Airport, SeaTac
Facility Site ID# 2291

Public comment period:
3/5/08 – 4/4/08

Draft Groundwater Study Report Available for Public Review & Comment

Ecology invites comments on Sea-Tac Airport Draft Groundwater Study Report. The focus of the groundwater study was Sea-Tac's Aircraft Operations and Maintenance Area, located on the east side of the airport property.

Ecology and the Port of Seattle (Port), which operates the airport, entered into a legal agreement called an Agreed Order on May 25, 1999. In response to the order, the Port completed a comprehensive computer modeling study of the groundwater throughout the airport area. The purpose of the study was to determine if contamination associated with airport operations affected public drinking water supply wells or surface water bodies outside airport property. Results showed that contamination associated with airport operations will not migrate off the airport property, or impact the public drinking water supply wells or surface water bodies outside airport property.

The contaminants of concern in the Draft Groundwater Study Report are primarily jet fuel and small amounts of gasoline, components of industrial solvents, mineral spirits (a relatively mild petroleum-based cleaning agent/solvent), lubricating oil and aircraft deicing fluids.

Ecology invites you to learn more about the study at an open house on March 17, 2008, where you will hear how the computer modeling was conducted, as well as other study details. You will be able to talk with Ecology and Port staff members, get answers to questions, and provide your comments to Ecology at the meeting or following the meeting.

The Sea-Tac Airport Draft Groundwater Study Report Open House will be held at the Burien Library, Margrette Lemon Room, located at 14700 Sixth Ave. S.W., Burien, WA 98166. The open house will start at 6 p.m. At 7 p.m., there will be a presentation followed by a question and answer period. The open house will conclude at 8 p.m. The Draft Groundwater Study Report document is available for public review at the following locations:

- Sea-Tac Airport, Port of Seattle, Main Terminal/Airport Office Building #A6012M, 17801 Pacific Hwy. S., Seattle, WA 98158 **206/988-5525**
- Burien Library, 14700 Sixth Ave S.W., Burien, WA 98166 **206/243-3490**
- Des Moines Library, 21620 11th Ave S., Des Moines, WA 98198 **206/824-6066**
- Valley View Library, 17850 Military Road S., SeaTac, WA 98188 **206/242-6044**
- Ecology Northwest Regional Office, 3190 160th Ave. SE, Bellevue, WA 98008-5482. (Please call **Sally Perkins** at **425/649-7190** or e-mail **Sper461@ecy.wa.gov** for an appointment.)
- Ecology's website at http://www.ecy.wa.gov/programs/tcp/sites/seatac/seatac_hp.htm

To comment or ask questions about the

report, please contact **Ching-Pi Wang**, Site Manager, at Washington State Department of Ecology, 3190 160th Ave. S.E., Bellevue, WA 98008 or at **425/649-7134** or e-mail **Cwan461@ecy.wa.gov**.

OKANOGAN COUNTY

**Silver Mountain Mine Site, County Road 4371, Loomis
Facility Site ID# 101**

**Public comment period:
1/29/08 - 2/29/08**

Five-Year Review Completed

Ecology has completed the third five-year periodic review at the Silver Mountain Mine (Site) located in Loomis, Okanogan County, Washington. Under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), this Site requires a five-year periodic review because contaminants remained on the Site following remedial actions. The purpose of the five-year review is to evaluate the implementation and performance of the remedy and to make sure the remedy is protective of human health and the environment.

In 1902, underground hard rock mining for silver and gold began at the Site. By 1956, developing the mine produced several tailings piles in a mine dump consisting of waste and mineralized rock. A cyanide heap leach pile, built in 1980, extracted silver and gold from the previously mined tailings. A mixture of sodium cyanide and water was sprayed on the top of the heap. The cyanide-laden solution collected in a leachate pond at the base of the heap. In 1981, the Site was abandoned without cleanup or treatment of chemicals on the Site. Cyanide solution remained in the leachate collection pond and in the heap pile. Also left onsite were several empty cyanide drums and large containers of carbon.

Ecology provided immediate reduction of risks at the Site by neutralizing the cyanide solution in 1981 and removing

drums of hazardous material left onsite in 1985. Remedial actions occurred at the Site in 1992 under the Environmental Protection Agency (EPA). These remedial actions included consolidation of mined material, closure of the mine entrance, capping of the heap leach pile, fence construction at the Site boundary and hydro seeding throughout the Site.

The five-year review concluded that in order to ensure continued protection of human health and the environment, annual inspections and maintenance of the cap need to be conducted, as well as monitoring the Site fence to make sure that it is protective of the remedy. The five-year review also noted that EPA and Ecology will consider and investigate establishment of a new covenant under the Uniform Environmental Covenant Act prior to the next five-year review. This may help ensure long-term protectiveness of the cap and non-usage of groundwater for human consumption, in addition to allowing Ecology and EPA to more effectively enforce the restrictions and bind successive owners.

The remedial action cleanup activities taken at the Site are consistent with the objectives of the National Oil and Hazardous Substances Pollution Contingency Plan and provide protection of human health and the environment. The cap remains in excellent condition and institutional controls remain in-place and appear to be effective. The Record of Decision and Explanation of Significant Differences indicate cleanup standards for the heap pile and mine dump materials and the surrounding soils are 200 milligrams per kilogram (mg/kg) for arsenic and 95 mg/kg for total cyanide. These protective levels reduce the risks of levels below the 1.0 Hazard Index or health based levels; and for arsenic, a human carcinogen, the cancer risk factor will be reduced below one in ten thousand.

The fourth five-year review will be conducted in 2012.

The 5-year review can be viewed on the Internet at the following link:

<http://yosemite.epa.gov/r10/cleanup.nsf/346a4822da38ae7088256da6005fc923/035be55d0eddb4968825654e006aae51!OpenDocument>

For more information or to submit written comments, please contact **Brianne Harcourt**, Site Manager, at the Ecology address listed above or at **509/454-7835** or e-mail **Brha461@ecy.wa.gov**.

SNOHOMISH COUNTY

Everett Shipyard, Inc., 1016 14th Street, Everett Facility Site ID# 2794

**Public comment period:
3/7/08 – 4/7/08**

Agreed Order

An Agreed Order and associated Public Participation Plan for the Everett Shipyard, Inc. site in Everett, WA are available for public comment. The Agreed Order requires the Port of Everett and Everett Shipyard to conduct a Remedial Investigation and Feasibility Study (RI/FS) and develop a Cleanup Action Plan for the site. A Public Participation Plan is also required for the site.

Concentrations of metals (including arsenic, cadmium, copper, lead, mercury, zinc) and organotins (including bulk tributyl tin [TBT]) exceed Model Toxics Control Act (MTCA) cleanup levels in soil.

Adjacent marine sediments have elevated concentrations of metals (arsenic, cadmium, copper, lead, mercury, zinc) and organotins, polycyclic aromatic hydrocarbons (PAHs; fluoranthene and chrysene), and phthalates (butyl benzyl phthalate and bis[2-Ethylexyl]phthalate) that exceed Sediment Quality Standards (SQS) and/or Cleanup Screening Levels

(CSLs) identified in the Sediment Management Standards.

Since its founding as Fishermen's Boat Shop in 1947, the facility has been cleaning, sandblasting, welding, and repairing marine vessels. Currently, the facility conducts repair work on marine vessels up to 125 feet long. The repair work involves tank evacuations, equipment disassembly, sandblasting, woodwork and metalwork, painting, and mechanical repairs.

The Agreed Order and associated draft Public Participation Plan are available for review and comment at the following locations:

- Everett Public Library, 2702 Hoyt Ave., Everett Library hours: Mon.-Wed. 10am-9pm, Thurs.-Sat. 10am-6pm, Sun. 1-5pm
- Ecology Headquarters Office, 300 Desmond Drive, Lacey, WA 98503. (Please call **Carol Dorn** at **360/407-7224** or e-mail **Cesg461@ecy.wa.gov** for an appointment.)
- Ecology's website at http://www.ecy.wa.gov/programs/tcp/sites/everett_shipyard/ev_ship_hp.htm
- Ecology's Public Involvement Calendar: www.ecy.wa.gov

For more information or to submit written comments, please contact **Hun Seak Park**, Site Manager, at the Ecology address listed above or at **360/407-7089** or e-mail **Hpar461@ecy.wa.gov**.

SPOKANE COUNTY

**North Market Street, Spokane
Facility Site ID# 667**

**Public comment period:
2/28/08 – 3/28/08**

Periodic Review

Ecology invites the public to review and comment on a periodic review of the North Market Street site. The site is located nearly one mile north of the City of Spokane. The approximate property

boundaries lie south of Gerlach Road, between North Market and Freya Streets and north of Lincoln Road. It lies over the Spokane Valley-Rathdrum Prairie Aquifer, a sole source aquifer that provides drinking water to more than 500,000 people.

A periodic review is conducted at least every five years after the initiation of a cleanup action as required by the Model Toxics Control Act (MTCA). The purposes of the review are to evaluate site conditions, after cleanup is considered complete, and to ensure protection of human health and the environment.

Previously, the site was used as a petroleum storage and distribution center that was part of an oil refinery complex. The site is now used for a fuel distribution facility and for some commercial and industrial land uses. Contaminants of concern include petroleum products, arsenic and manganese.

The Tosco Refining Company and Phillips Petroleum Company were the potentially liable persons (PLPs) responsible for site cleanup. The two companies merged during the cleanup action. Since the Tosco/Phillips merger, Phillips and Conoco merged creating the ConocoPhillips Company, now responsible for the cleanup.

Several improvements are in place at the site as a result of the cleanup actions:

- Contaminated soils from 15 to 20 feet below ground surface were removed. The removal combined with thermal (heat) treatment removed the potential pathway for direct skin contact and ingestion.
- A large source of groundwater contamination was removed.
- The area containing groundwater contamination that is called a plume decreased in size.
- A technology called air sparging continues to treat any remaining groundwater contamination.

- A bioventing system continues to decrease soil vapor concentrations.

- A restrictive covenant was recorded on the fuel terminal property and properties that lie over the groundwater plume. The covenant limits land uses. Restrictions include no withdrawal of water, maintenance of fences and locked gates. These restrictions limit or prohibit any activity that will interfere with the integrity of the cleanup actions and require future owners to comply with these restrictions.

The site cleanup and ongoing treatment systems are performing as expected. Monitoring of the cleanup actions will continue to address any groundwater contamination that remains at the site. Further periodic reviews are required as long as institutional controls are in place at the site.

The periodic review may be reviewed at the following locations:

- Spokane Public Library, Hillyard Branch 4005 N. Cook, Spokane
- Ecology Eastern Regional Office, 4601 N. Monroe, Spokane. (Please call **Mrs. Johnnie Landis** at **509/329-3415** for an appointment.)
- Ecology's Toxics Cleanup Program website at http://www.ecy.wa.gov/programs/tcp/sites/n_mkt_st/nms_hp.htm
- For more information or to submit written comments, please contact **William J. Fees**, P.E., Site Manager, at the Ecology address listed above or at **509/329-3589** or e-mail **Wfee461@ecy.wa.gov**.

**SemMaterials Site (Koch Materials Company), 4327 North Thor Street, Spokane
Facility Site ID# 16655424**

**Public comment period:
3/2/08 – 3/31/08**

Public meeting Tuesday, March 11, 2008

Ecology invites you to review and comment on an Agreed Order for a Remedial Investigation and Feasibility Study including a Scope of Work and Public Participation Plan for the site. You are also invited to attend a public meeting on **Tuesday, March 11, 2008** at 7 p.m. to learn more about the site and the public participation process. The meeting will be held at the Northeast Community Center, 4001 North Cook Street, Spokane.

The Agreed Order is a legal document issued by Ecology. It formalizes the agreement between Ecology and the Potentially Liable Persons (PLPs) for the cleanup actions needed at the site. The PLPs are BNSF Railway Company, Koch Materials LLC, Marathon Oil Company, and SemMaterials, L.P. The purpose of the Remedial Investigation is to gather information to determine where and how much petroleum contamination may be in soil and groundwater at the site. The purpose of the Feasibility Study is to evaluate cleanup alternatives and propose a cleanup action.

SemMaterials is the current operator of the leased facility formerly known as Koch Materials. The facility receives and stores petroleum products used in the manufacture of asphalt and sealants. The site has reportedly been used for petroleum-related operations since 1910.

Koch Materials operated the facility from 1983 to 2005. Husky Oil Company of Delaware (now merged with Marathon Oil Company) operated the facility from the 1970s until 1982. BNSF Railway Company owns the property where the facility is located.

In December 1992 three petroleum storage tanks were removed from the northeast corner of the site. During the tank removal, petroleum-contaminated soil was found. Soil borings were drilled to determine the depth of contamination. Contamination was found as deep as 125 feet. This raised concerns because the site lies over the Spokane Valley-Rathdrum Prairie Aquifer.

Ecology became involved at the site in 1993 and ranked the site a three on the Hazardous Sites List. The Hazardous Sites List is a record of contaminated sites throughout the state that are ranked on a scale of one to five. One represents the greatest potential threat to human health and the environment; five represents the least potential threat. The site ranked a three because of the level of contamination in soil and the potential for aquifer contamination

The documents may be reviewed at the following locations:

- Spokane Public Library, Hillyard Branch 4005 N. Cook, Spokane
- Ecology Eastern Regional Office, 4601 N. Monroe, Spokane. (Please call **Mrs. Johnnie Landis** at **509/329-3415** for an appointment.)
- Ecology's website at http://www.ecy.wa.gov/programs/tcp/sites/semMat/semMat_hp.htm

For more information or to submit written comments, please contact **William J. Fees**, P.E., Site Manager, at the Ecology address listed above or at **509/329-3589** or e-mail **Wfee461@ecy.wa.gov**.

THURSTON COUNTY

**West Bay Marina, 2100 West Bay Drive, Olympia
Facility Site ID# 92753273**

**Public comment period:
2/4/08 – 3/4/08**

Agreed Order

Department of Ecology (Ecology) and the West Bay Marina Associates are entering into an Agreed Order to investigate and cleanup contamination at the West Bay Marina site in Olympia. The Agreed Order will require the West Bay Marina Associates to:

- Complete a Remedial Investigation to determine the nature and extent of contamination.

- Complete a Feasibility Study to examine potential cleanup remedies.

- Draft a Cleanup Action Plan (CAP) to describe the proposed cleanup remedy.

The Marina entered the Voluntary Cleanup Program in 1999 to clean up a petroleum release from an underground storage tank system. Thurston County Health Department recommended “No Further Action” after the underground storage tanks were removed and contaminated soils were excavated. Ecology is now requiring additional work be done to determine full nature and extent of contamination.

The Agreed Order will be available for review from February 4 through March 4, 2008 at the following locations:

- Timberland Olympia Library, 313 8th Avenue SE, Olympia **360/352-0595**
- Ecology Southwest Regional Office, 300 Desmond Drive, Lacey, WA 98504-7775. (Please call **360/407-6365** or e-mail **Dene461@ecy.wa.gov** for an appointment.)
- Ecology's website at http://www.ecy.wa.gov/programs/tcp/sites/westBayMarina/wbm_hp.htm

For more information or to submit written comments, please contact **Guy Barrett**, Site Manager, at the Ecology address listed above or at **360/ 407-7115** or e-mail **Gbar461@ecy.wa.gov**. For public involvement information, please contact **Meg Bommarito**, Public Involvement Coordinator at **360/407-6255** or e-mail **Mbom461@ecy.wa.gov**.

INDEPENDENT CLEANUPS

A property owner may conduct an independent cleanup of contamination and submit reports to Ecology. When a property owner applies to Ecology for review of their independent cleanup, the site enters the Voluntary Cleanup Program. After review, Ecology sends a letter to the property owner stating either that additional work is required to be

removed from the list of hazardous waste sites or that no further action is needed.
