

Site Register

WASHINGTON STATE DEPARTMENT OF ECOLOGY TOXICS CLEANUP PROGRAM

MAY 22, 2008

The Site Register is published every two weeks to inform you about public comment periods, public meetings, hearings, and other information related to the study and cleanup of hazardous waste sites under the Model Toxics Control Act, Chapter 70.105D RCW.

You may also find information about public hearings, meetings, workshops, and open public comment periods on Ecology's web page. Go to www.ecy.wa.gov and click on the Public Involvement Calendar.

If you have questions or want to be added to the mailing list (electronic or paper) for the Site Register, contact Linda Thompson at 360/407-6069 or e-mail Ltho461@ecy.wa.gov. Specific regional contacts are listed after each entry.

If you need this publication in an alternate format, please call the Toxics Cleanup Program at 360/407-7170. Persons with hearing loss may call 711 for Washington Relay Service. Persons with a speech disability may call 877/833-6341.

FORMAL CLEANUPS

Ecology oversees complex cleanup sites to ensure that your health and that of the environment are protected.

CHELAN COUNTY

Sunnyslope Elementary School, 3109 School Street, Wenatchee Facility Site ID# 5951907

Orchard Middle School, 1024 Orchard Avenue, Wenatchee Facility Site ID# 771247

**Public comment period:
4/30/08 – 5/30/08**

*Interim Remedial Action Plan/
Determination of Non-Significance*

Ecology is providing an opportunity for the public to comment on the Interim Remedial Action Plan and the issuance of a Determination of Non-Significance (DNS) for the soil cleanup at the Sunnyslope Elementary and Orchard Middle Schools in Wenatchee.

Soil beneath the grass on the playground at the school is contaminated with lead and arsenic. The contamination likely comes from the use of these chemicals as orchard pest sprays in the early and mid 20th century. Sampling and analysis indicate that contamination exceeds state cleanup levels for lead and arsenic.

The alternative preferred by Ecology at both schools consists primarily of placing clean soil on top of the existing soil, and establishing new grass on this clean soil. Ecology has determined that this alternative will provide the necessary barrier to prevent human exposure to the contaminants. At each school, the plan includes modification of the existing irrigation system to maintain the turf grass cover.

After reviewing the State Environmental Policy Act (SEPA) environmental checklist, Ecology has determined that the cleanup action will not have a probable significant adverse impact on the environment and an Environmental Impact Statement (EIS) is not required.

The Interim Action Plan and SEPA documents are available for review at the following locations:

- Sunnyslope Elementary School, 3109 School Street, Wenatchee
 - Orchard Middle School, 1024 Orchard Avenue, Wenatchee
 - Ecology Central Regional Office, 15 West Yakima Ave, Suite 200, Yakima, WA 98902-3452. (Please call **509/454-7658** for an appointment.)
 - Ecology's website at http://aww.ecydev/programs/tcp/sites/sunnyslope/sunnyslope_hp.htm
 - Ecology's Public Involvement Calendar: <http://apps.ecy.wa.gov/pubcalendar/calendar.asp>
- For more information or to submit written comments, please contact **Jeff Newschwander**, Site Manager, at the Ecology address listed above or at **509/454-7842** or e-mail Jene461@ecy.wa.gov.

CLALLAM COUNTY

Port Angeles Harbor Sediments Investigation, Port Angeles

**Public comment period:
4/28/08 – 5/29/08**

*Draft Sampling and Analysis Plan
Available for Public Comment*

Ecology is planning a study of pollution in the sediments of Port Angeles Harbor. Past sediment sampling has shown that levels of several toxic chemicals exceed

state cleanup standards. These chemicals include polycyclic aromatic hydrocarbons (PAHs), wood debris, dioxins, furans, and polychlorinated biphenyls (PCBs).

This study will look at:

- Gaps in our current understanding of pollution in the harbor.
- The nature and extent of pollution in harbor sediments.
- How sediments and bottom currents move throughout the harbor.
- "Fingerprinting" pollutants to determine where they came from.
- The human health and ecological risk of the contaminants of highest concern.

Port Angeles Harbor is one of several Puget Sound bays being targeted for priority cleanup by the Puget Sound Initiative. Ecology is using special funding from this initiative to investigate sediment pollution and develop a strategy for cleaning up the harbor.

The draft Sampling and Analysis Plan and Public Participation Plan are available for public review and comment:

- Port Angeles Public Library, 2210 South Peabody Street, Port Angeles, WA 98362 **360/417-8500**
- Peninsula College, 1502 Lauridsen Blvd., Port Angeles, WA 98362 **360/417-6280**
- Ecology Southwest Regional Office, 300 Desmond Drive, Lacey, WA 98504-7775. (Please call **360/407-6365** or e-mail **Dene461@ecy.wa.gov** for an appointment.)
- Ecology's website at http://www.ecy.wa.gov/programs/tcp/sites/portAngelesHarborSed/paSed_hp.htm.

For more information or to submit written comments, please contact **Cynthia Erickson**, Site Manager, at **360/407-6361** or e-mail **Ceri461@ecy.wa.gov**. For public involvement information, please contact **Hannah Aoyagi**, Public Involvement Coordinator at **360/407-6790** or e-mail **Haoy461@ecy.wa.gov**.

GRAYS HARBOR COUNTY

Masco Petroleum Inc., 112 North Boone Street, Aberdeen

**Public comment period:
5/27/08 – 6/27/08**

Underground Storage Tank Settlement Agreement Available for Public Comment

Ecology would like your comments on the proposed settlement with Masco Petroleum Inc. (Masco). In January of 2008, Ecology fined Masco for not complying with corrosion protection requirements for their underground storage tanks (USTs).

According to this settlement, Ecology will reduce Masco's fine from \$600.00 to \$0.00. Masco agrees to:

- Participate in training about Washington's underground storage tank (UST) law.
- Develop and use a record-keeping system for its USTs. This system will help them provide information during Ecology inspections.
- Spend no less than \$600.00 on improvements that help them comply with UST laws.

Documents related to the settlement are available for public review at:

- Aberdeen Timberland Library, 121 East Market Street, Aberdeen, WA 98520-5292 **360/533-2360**
- Ecology Southwest Regional Office, 300 Desmond Drive, Lacey, WA 98504-7775. (Please call **360/407-6365** or e-mail **Dene461@ecy.wa.gov** for an appointment.)
- Ecology's website: <http://www.ecy.wa.gov/programs/tcp/sites/mascoPetro/masco.html>.

For more information or to submit written comments, please contact **Lisa Shriver**, Site Manager, at the Ecology address listed above or at **360/407-6332** or e-mail **Lshr461@ecy.wa.gov**.

For public involvement information, please contact **Hannah Aoyagi**, Public Involvement Coordinator at **360/407-6790** or e-mail **Haoy461@ecy.wa.gov**.

KING COUNTY

ConocoPhillips Renton Terminal, 2423 Lind Avenue Southwest, Renton Facility Site ID# 2070

Change in Site Status

Ecology has determined two Potentially Liable Persons (PLPs) for ConocoPhillips Renton Terminal. The PLPs are ConocoPhillips and ExxonMobil. They will be managed under a single Agreed order. The Notices of Potential Liability under the Model Toxics Control Act were mailed in April 2008.

ConocoPhillips Renton terminal is located at 2423 Lind Avenue Southwest, Renton, Washington. This site is an operating petroleum storage and handling facility. Ecology issued Order DE 87-N301 requiring ExxonMobil to recover product from a discovery in 1986. Under the Voluntary Cleanup Program, ConocoPhillips is remediating a petroleum hydrocarbon plume that resulted from a release on the property in 2002. The 2002 release by ConocoPhillips superimposed upon the older 1986 ExxonMobil plume, resulting in commingled groundwater plumes.

The contaminants of concern in soil, groundwater and surface water are Gasoline, BTEX, Diesel, MTBE, Ethanol, and possibly lead.

You may review the ConocoPhillips Renton Terminal documents at:

- Ecology Northwest Regional Office, 3190 160th Ave. SE, Bellevue, WA 98008-5482. (Please call **Sally Perkins** at **425/649-7190** for an appointment.)

For any technical questions, please contact **Jerome Cruz**, Site Manager, at the Ecology address listed above or at **425/649-7094** or e-mail **Jcru461@ecy.wa.gov**.

Lake Union Air Service Inc., Parcel C Property, 1100 West Lake Ave., Seattle Facility Site ID# 26674683

Public comment period:
5/9/08 – 6/9/08

Determination of no further action

Ecology invites comments on a determination of no further action at the Lake Union Air Parcel C Property (Parcel C). Parcel C is located on the southern extreme of the west shore of Lake Union along Westlake Avenue North. Ecology has reviewed an environmental investigation at the property and determined no further action was needed for this site at this time.

In 1993, Ecology and the Committee for Seattle Commons (Commons) signed a De Minimis Consent Decree. Commons was a non-profit Washington corporation who wanted to purchase Parcel C to develop it as a public park by City of Seattle or other public entities. However, Seattle residents did not approve the development proposal by the Commons and the purchase of Parcel C by Commons never occurred. City Investors X L.L.X/Vulcan NW Inc. is the current owner of Parcel C.

When Commons was interested in purchasing Parcel C, they hired Shannon and Wilson Inc. to perform an environmental assessment of the property in March 1999. The environmental assessment indicated that no significant contamination existed at the site. A Volatile Organic Carbon (VOC) plume, metals, and Total Petroleum Hydrocarbons (TPH) located off site had not impacted the property. Based on this information, Ecology has determined that the site does not pose a threat to human health or the environment.

Documents related to the cleanup are available for public review at:

- Ecology Northwest Regional Office, 3190 160th Ave. SE, Bellevue, WA 98008-5482. (Please call **Sally Perkins** at **425/649-7190** for an appointment.)

• Ecology's website: http://www.ecy.wa.gov/programs/tcp/sites/LakeUnionAirParcelC/LakeUnionAirParcelC_hp.htm

• Ecology's Public Involvement Calendar: www.ecy.wa.gov

For more information or to submit written comments, please contact **Sunny Becker**, Site Manager, at Washington Department of Ecology, 3190 160th Ave. S.E., Bellevue, WA 98008 or at **425/649-7187** or e-mail Hlin461@ecy.wa.gov.

KITSAP COUNTY

DNR Lease Area Site, Southwest end of Port Gamble Bay Facility Site ID# 1567413

Public comment period:
5/9/08 – 6/9/08

Agreed Order

A Work Plan and Public Participation Plan for the Washington Department of Natural Resources (DNR) Lease Area site on Port Gamble Bay are available for public comment. The Work Plan describes the process that will be used to gather information about the Site, and will be used to prepare a Remedial Investigation and Feasibility Study (RI/FS) report. Ecology will lead the proposed investigation.

The site consists of 74 acres of state-owned aquatic land. From 1974 to 1995, it was a log storage area for the Pope & Talbot, Inc. Sawmill Site (see facility site #93937775). Log rafting deposited wood debris on the bed of Port Gamble Bay. Wood debris smothers near-shore habitat and causes changes in water quality. Investigations have also found elevated levels of cadmium in sediment.

The Work Plan and Public Participation Plan are available for review and comment at the following locations:

- Poulsbo Library, 700 NE Lincoln Street, Poulsbo, WA 98370 Hours: Mon.-Thurs. 10 a.m.-8 p.m., Fri.-Sat. 10 a.m.-6 p.m., Sun. 1-5 p.m.

• Ecology Headquarters Office, 300 Desmond Drive, Lacey, WA 98503. (Please call **Carol Dorn** at **360/407-7224** or e-mail Cesg461@ecy.wa.gov for an appointment.)

• Ecology's website at http://www.ecy.wa.gov/programs/tcp/sites/dnrAquaticLandLease/dnr_hp.htm

• Ecology's Public Involvement Calendar: www.ecy.wa.gov

For more information or to submit written comments, please contact **Kevin MacLachlan**, Site Manager, at the Ecology address listed above or at **360/407-6798** or e-mail Kmac461@ecy.wa.gov.

Pope & Talbot, Inc. Sawmill Site, NE View Drive, Port Gamble Facility Site ID# 93937775

Public comment period:
5/9/08 – 6/9/08

Agreed Order

An Agreed Order and associated Public Participation Plan for the Pope & Talbot, Inc. Sawmill site in Port Gamble are available for public comment. The Agreed Order requires Pope Resources LP and Olympic Property Group LLC to conduct a Remedial Investigation and Feasibility Study (RI/FS) and to develop a Public Participation Plan and draft Cleanup Action Plan for the site.

The Pope & Talbot, Inc. Sawmill was a forest products manufacturing facility for approximately 142 years (1853 to 1995).

Upland manufacturing activities resulted in the release of hazardous substances, including petroleum hydrocarbons, carcinogenic polycyclic aromatic hydrocarbons, and metals. Some of this contamination has been found in soil and groundwater. Log rafting and chip loading operations deposited wood debris on the bed of Port Gamble Bay. Wood debris smothers near-shore aquatic habitat and causes changes in water quality.

Between 2002 and 2007, Ecology and the companies removed approximately 26,000 tons of soil and 31,000 cubic yards of wood debris from the site.

The Agreed Order and associated draft Public Participation Plan are available for review and comment at the following locations:

- Poulsbo Library, 700 NE Lincoln Street, Poulsbo, WA 98370 Hours: Mon.-Thurs. 10 a.m.-8 p.m., Fri.-Sat. 10 a.m.-6 p.m., Sun. 1-5 p.m.
- Ecology Headquarters Office, 300 Desmond Drive, Lacey, WA 98503. (Please call **Carol Dorn** at **360/407-7224** or e-mail **Cesg461@ecy.wa.gov** for an appointment.)
- Ecology's website at **http://www.ecy.wa.gov/programs/tcp/sites/pope/pope_hp.html**
- Ecology's Public Involvement Calendar: **www.ecy.wa.gov**

For more information or to submit written comments, please contact **Kevin MacLachlan**, Site Manager, at the Ecology address listed above or at **360/407-6798** or e-mail **Kmac461@ecy.wa.gov**.

MASON COUNTY

Oakland Bay Sediments Investigation, Shelton

Public comment period:
6/2/08 – 7/2/08

Draft Sampling and Analysis Plan Available for Public Comment

Public Meeting: June 16, 2008

Ecology is planning a study of pollution in the sediments of Oakland Bay. Historical industrial and commercial use of the Bay has led to contamination of sediments. Past sediment sampling has shown levels of toxic chemicals present above state cleanup standards including polycyclic aromatic hydrocarbons (PAHs), wood waste compounds, metals and tributyltin.

The goals of the Sediments Investigation are to:

- Determine the nature and extent of potential sediment contamination and wood waste throughout Oakland Bay.
- Conduct a survey to determine the distribution of wood waste.
- Attempt to determine the potential source(s) of dioxin, total petroleum hydrocarbons (TPH) and polycyclic aromatic hydrocarbon (PAH) contamination.
- Characterize the horizontal and vertical extent of contamination in sediment.
- Analyze sediments and shellfish for contaminants in order to evaluate potential risk to humans and the ecosystem.

As part of Governor Gregoire's Puget Sound Initiative, several areas in the south Sound have been identified as high priority cleanup areas for Ecology's Toxics Cleanup Program. Early actions in these areas will contribute significantly to the restoration of Puget Sound. The Oakland Bay is one of these early action areas and this investigation is being funded through the Puget Sound Initiative.

The Sampling and Analysis Plan will be available for public review and comment from June 2 – July 2, 2008 at the following locations:

- William G. Reed / Shelton Timberland Library, 710 W Alder Street, Shelton, WA 98501 **360/426-1362**
- Ecology Southwest Regional Office, 300 Desmond Drive, Lacey, WA 98504-7775. (Please call **360/407-6365** or e-mail **Debbie Nelson** at **Dene461@ecy.wa.gov** for an appointment.)
- Ecology's website: **http://www.ecy.wa.gov/programs/tcp/sites/oaklandBay/oaklandBay_hp.htm**

Ecology will be hosting a public meeting on Thursday, June 16 from 6:30 to 8:30 p.m. at the Shelton Civic Center (525 W. Cota, Shelton) to discuss the Sampling

and Analysis Plan. A presentation will be given at 7 p.m.

For more information or to submit written comments, please contact **Cynthia Erickson**, Site Manager, at the Ecology address listed above or at **360/407-6361** or e-mail **Ceri461@ecy.wa.gov**. For public involvement information, please contact **Meg Bommarito**, Public Involvement Coordinator at **360/407-6255** or e-mail **Mbom461@ecy.wa.gov**.

OKANOGAN COUNTY

Brewster Elementary School, 502 S 7th Street, Brewster Facility Site ID# 7994127

Public comment period:
5/15/08 – 6/16/08

Delisting from Hazardous Sites List

Ecology is proposing to remove the Brewster Elementary School and Softball Field (Site) located at 502 South 7th Street in Brewster, from the Hazardous Sites List. The Site is currently ranked a "3". Sites can be ranked from "1" to "5". A rank of "1" is the highest level of environmental concern compared to other sites on the list, and a rank of "5" is the lowest.

As a former old orchard, the Site was subjected to historical pesticide applications. Lead arsenate was widely used to control the codling moth prior to 1950. Unfortunately, this resulted in lead and arsenic contamination at many former orchards throughout central Washington. In 2002, Ecology staff tested the soil at the Site and found lead and arsenic contamination exceeding state cleanup levels.

During the summer of 2006, Ecology staff managed a cleanup at the Site designed to reduce or eliminate the lead and arsenic contamination. It involved two major steps: 1) placement of geotextile fabric, and 2) import and placement of a clean topsoil cap. New seed was planted to establish grass,

and new infield material was imported. Ecology staff verified through confirmational sampling that the contamination had been completely covered with a layer of clean topsoil.

Following cleanup, an environmental covenant was recorded for the property with the Okanogan County Auditor. The environmental covenant provides a permanent legal record of the contamination that remains on the property, and prevents activities at the site that might disturb or damage the soil cap.

Now Ecology proposes removing the Site from Hazardous Sites List. It no longer poses a threat to human health and the environment.

Supporting documents are available for review at the following locations:

- Brewster School District Administration Building, 503 S 7th Street, Brewster
- Ecology Central Regional Office, 15 West Yakima Ave, Suite 200, Yakima, WA 98902-3452. (Please call **509/454-7658** for an appointment.)
- Ecology's website: http://www.ecy.wa.gov/programs/tcp/sites/brewster/brewsterElem_hp.htm
- Ecology's Public Involvement Calendar: <http://apps.ecy.wa.gov/pubcalendar/calendar.asp>

For more information or to submit written comments, please contact **Jeff Newschwander**, Site Manager, at the Ecology address listed above or at **509/454-7842** or e-mail Jene461@ecy.wa.gov.

PIERCE COUNTY

B&L Woodwaste, 2201 6th Avenue, Milton Facility Site ID# 1203

Public comment period:
5/26/08 – 6/26/08

Consent Decrees to Implement Cleanup Action Plan Available for Public Review and Comment

Ecology and Murray Pacific Corp (Murray Pacific) are entering into a Consent Decree to continue cleaning up contamination at the B&L Woodwaste site, located along the border of Milton and Fife. This legal document requires Murray Pacific to implement the Cleanup Action Plan.

A second consent decree is proposed between Ecology, Wasser and Winters Company and the Louisiana Pacific Corporation (Louisiana Pacific), requiring partial funding for the cleanup. The Louisiana Pacific Consent Decree requires payment of \$1 million to help fund the implementation of the cleanup action plan.

The B & L Woodwaste landfill was used from mid 1970's until the early 1980's. Woodwaste mixed with soil and Asarco slag, originating from log sort yards in Commencement Bay were taken to this site for disposal. The Asarco slag leached arsenic into the soils groundwater.

The Consent Decrees will be available for review and comment from May 26 – June 26 at the following locations:

- Pierce County Library, 1000 Laurel St., Milton **253/922-2870**
- Tacoma Main Library, 1102 Tacoma Ave. South, Tacoma **253/591-5666**
- Citizens for A Healthy Bay, 917 Pacific Avenue, Suite 100, Tacoma **253/383-2429**
- Ecology Southwest Regional Office, 300 Desmond Drive, Lacey, WA 98504-7775. (Please call **360/407-6365** or e-mail Dene461@ecy.wa.gov for an appointment.)
- Ecology's website: www.ecy.wa.gov/programs/tcp/sites/B_L_Woodwaste/B_L_woodwaste_hp.htm

For more information or to submit written comments, please contact **Dom Reale**, Site Manager, at the Ecology address listed above or at **360/407-6266** or e-mail Drea461@ecy.wa.gov. For TTY, please call **711** or **1-800/833-6388**. For public involvement information,

please contact **Meg Bommarito**, Public Involvement Coordinator at **360/407-6255** or e-mail Mbom461@ecy.wa.gov.

BNSF D Street Pipeline, East D Street, Tacoma Facility Site ID# 2923141

Public comment period:
5/22/08 – 6/23/08

Consent Decree for Cleanup and SEPA Determination Available for Public Comment

Ecology would like your comments on the proposed Cleanup Action Plan for the BNSF D Street Pipeline site. The pipeline has leaked petroleum pollution onto several properties through which it runs. Potentially liable persons (PLPs) include BNSF Railway Company, City of Tacoma, Washington State Department of Transportation, Home Electric Company, and 1815 East D Street LLC. As part of the cleanup agreement, the PLPs will:

- Dig up and dispose of polluted soils on the site
- Install groundwater monitoring wells and sample them to measure pollutant levels
- Limit any development or activity that might interfere with the cleanup

Cleanup of contaminated soils and groundwater must meet state standards under the Model Toxics Control Act (MTCA), Chapter 70.105D

The following cleanup documents are available for review and comment:

- The Consent Decree for cleanup
- The Draft Cleanup Action Plan (CAP)
- The Remedial Investigation and Feasibility Study (RI/FS)
- State Environmental Policy Act (SEPA) Checklist and Determination

These documents related to the cleanup are available for public review at:

- Tacoma Public Library, 1102 Tacoma

Avenue, Tacoma, WA 98402 **253/591-5666**

- Citizens for a Healthy Bay, 917 Pacific Avenue, Suite 100, Tacoma, WA 98402, **253/383-2429**

- Ecology Southwest Regional Office, 300 Desmond Drive, Lacey, WA 98504-7775. (Please call **360/407-6365** or e-mail **Dene461@ecy.wa.gov** for an appointment.)

- Ecology's website: http://www.ecy.wa.gov/programs/tcp/sites/BNSF_oil_pipeline/BNSF_oil_pipeline_hp.htm.

For more information or to submit written comments, please contact **Marv Coleman**, Site Manager, at the Ecology address listed above or at **360/407-6259** or e-mail **Mcol461@ecy.wa.gov**. For public involvement information, please contact **Hannah Aoyagi**, Public Involvement Coordinator at **360/407-6790** or e-mail **Haoy461@ecy.wa.gov**.

USG Interiors Inc. Puyallup, 925 River Road E., Puyallup Facility Site ID# 1217

Public comment period:
4/24/08 – 5/23/08

Agreed Order for Remedial Investigation and Feasibility Study

Ecology is entering into an Agreed Order with USG Interiors Inc. (USG) to investigate and clean up the USG Puyallup site. The site sits on the banks of the Puyallup River. Before 1983, USG used the site to dispose of waste from their rock wool manufacturing plant in Tacoma. There is known arsenic contamination in soil and groundwater.

Under this agreement, USG Interiors, Inc. will:

- Conduct a Remedial Investigation to determine the extent and nature of pollution at the site
- Complete a Feasibility Study to evaluate possible cleanup actions
- Draft a Cleanup Action Plan

The Agreed Order and Public Participation Plan are available for public review and comment at:

- Puyallup Public Library, 324 S. Meridian, Puyallup, WA 98371 **253/841-5454**

- Citizens for a Healthy Bay, 917 Pacific Avenue Suite 100, Tacoma, WA 98402 **253/383-2429**

- Ecology Southwest Regional Office, 300 Desmond Drive, Lacey, WA 98504-7775. (Please call **360/407-6365** or e-mail **Dene461@ecy.wa.gov** for an appointment.)

- Ecology's website at http://www.ecy.wa.gov/programs/tcp/sites/USG_Interiors/usg_interiors_hp.htm

For more information, please contact **Dom Reale**, Site Manager, at the Ecology address listed above or at **360/407-6266** or e-mail **Drea461@ecy.wa.gov**. For public involvement information, please contact **Hannah Aoyagi**, Public Involvement Coordinator at **360/407-6790** or e-mail **Haoy461@ecy.wa.gov**.

SNOHOMISH COUNTY

North Marina West End Site, Between 11th and 14th Streets, off West Marine View Drive, Everett Facility Site ID# 3306834

Public comment period:
5/5/08 – 6/3/08

Agreed Order

An Agreed Order and associated Public Participation Plan, for the North Marina West End Site in Everett, are available for public comment. The Agreed Order requires the port of Everett to conduct a Remedial Investigation and Feasibility Study (RI/FS), and to develop a Public Participation Plan and a draft Cleanup Action Plan for the Site.

The North Marina West End Site was used for marine and general industrial purposes such as trucking and welding.

It also contained a number of storage tanks for diesel fuel, gasoline, and oil. Polycyclic aromatic hydrocarbons (PAHs), petroleum hydrocarbons, and five (5) metals have been found to exceed Model Toxics Control Act (MTCA) cleanup levels in soil. Two (2) metals, vinyl chloride and petroleum hydrocarbons, exceed MTCA cleanup levels in groundwater. One PAH (acenaphthene) exceeds its respective Sediment Quality Standard (SQS) in sediment.

The port has completed significant investigation and partial cleanup of this Site as part of a larger North Marina Redevelopment project known as Port Gardner Wharf. Ecology is working with the port to complete this investigation and cleanup.

The North Marina West End Site is part of the port's larger North Marina Redevelopment project. Information about the redevelopment can be found at the following web site: <http://www.portofeverett.com/home/index.asp?page=71>

The Agreed Order and associated draft Public Participation Plan are available for review and comment at the following locations:

- Everett Public Library, 2702 Hoyt Avenue, Everett, WA 98201 Hours: Mon.-Wed. 10 a.m.-9 p.m., Thurs.-Sat. 10 a.m.-6 p.m., Sun. 1-5 p.m.

- Ecology Headquarters Office, 300 Desmond Drive, Lacey, WA 98503. (Please call **Carol Dorn** at **360/407-7224** or e-mail **Cesg461@ecy.wa.gov** for an appointment.)• Ecology's website at http://www.ecy.wa.gov/programs/tcp/sites/nMarinaWestEnd/nMarinaWestEnd_hp.htm

- Ecology's Public Involvement Calendar: www.ecy.wa.gov

For more information or to submit written comments, please contact **Andy Kallus**, Site Manager, at the Ecology address listed above or at **360/407-7259** or e-mail **Aka461@ecy.wa.gov**.

SPOKANE COUNTY

Spokane River Metals: Harvard Road Recreation Area, located near the City of Spokane Valley in unincorporated areas Facility Site ID# 615198

Public comment period:
4/30/08 – 5/30/08

River Recreation and Access Area Closed During Cleanup

Historic mining practices in the Coeur d'Alene basin resulted in lead, arsenic, zinc, and cadmium contamination of certain shoreline areas along the Spokane River. These contaminants, known as heavy metals, washed downstream from Idaho and settled in soil and sediments of the river. Ecology cleaned up three of nine proposed beach areas and now proposes to clean up a fourth Washington shoreline area known as Harvard Road. The site is used as a recreational area for access to the Spokane River. The area also serves as a primary fish habitat location.

The site covers less than one acre and lies along the northern bank of the Spokane River in Spokane County. It is nearly 3 miles west of the Idaho state line and immediately west of the Harvard Road Bridge. The cleanup is scheduled to begin summer 2008 and end by October 31, 2008. The area will be closed to the public during construction.

Cleanup work focuses on:

- Removal of sediments contaminated with lead, arsenic, zinc and cadmium
- Backfilling the area with clean sand
- Placing a protective cap of clean sand and gravel on the lower portion of the river bank where contaminants will not be removed
- Creating a new gravel boat launch
- Placing gravel mix at certain fish habitat areas; and installing signs and barriers

The draft Construction Specifications and Design Drawings which provide project details are available for review. A State Environmental Policy Act (SEPA) checklist, SEPA Determination of Non-Significance (DNS), and Substantive Permit Requirements are also available for review at these locations:

- Argonne County Library, 4322 N. Argonne, Spokane, WA
- Spokane Valley Library, 12004 E. Main, Spokane Valley, WA
- Spokane Public Library, 906 W. Main, Spokane, WA

STEVENS COUNTY

Whitty's Mini Mart 2 Site, 485 South Main Street, Colville Facility Site ID# 766

Public comment period:
5/8/08 – 6/6/08

Periodic Review Available to the Public

Ecology invites the public to review and comment on a periodic review of the Whitty's Mini Mart 2 Site.

A periodic review is required by the Model Toxics Control Act (MTCA) at least every five years after the initiation of a cleanup action. The review evaluates post-cleanup site conditions. The review ensures the cleanup action is protective of human health and the environment.

The site operated as a retail gasoline service station from 1977 until closure in 1992. The business then re-opened as an auto service shop. In 2007 the property was sold and is now being developed into commercial office space. A fuel distribution pipe at the site leaked, causing gasoline contamination on site and in a creek and storm water drain adjacent to the property. A private residence southwest of the site also was impacted by the contamination. The affected creek ran through their property.

Several cleanup actions were implemented by the City of Colville and Ecology at the site between 1984 and 1999. Ecology completed a Cleanup Action Plan in 1999 that included the following:

- Removal of approximately 350 cubic yards of petroleum-contaminated soils. These soils were encountered during trench construction, underground storage tank (UST) removal, and associated activities.
- Pumping and treating approximately 10,000 gallons of contaminated ground water during the decommissioning of the USTs.
- Installing a soil vapor extraction system to treat the shallow impacted soils at the site. Installing lateral vapor extraction (vacuum) lines across the site with emphasis in the area where the UST piping had been.
- Installing ground water interception trenches along the downgradient boundaries of the site.
- Installing a ground water air-sparging system to treat ground water within the trenches and at strategic points across the site. The system operated from

August 1994 to July 1995 and removed an estimated 370 pounds of petroleum hydrocarbons.

- Implementing long-term, quarterly ground water monitoring in 1992. Implementing a Sampling and Analysis Plan in 1997 with ground water monitoring occurring semi-annually.
- Implementing institutional controls including maintenance of the asphalt/concrete cap on the property to reduce the risk of exposure to contaminated soils and recording a restrictive covenant on the deed of the property that conditions any site activity that may cause exposure to contaminated soils.

The current status of the Whitty's Mini Mart 2 site is:

- The cleanup actions implemented at the site continue to be protective of human health and the environment.
- Concentrations of petroleum product in ground water decreased since initiation of the cleanup. Cleanup levels have been met at each of the monitoring wells except monitoring well 8. Monitoring well 8 is likely impacted by leaks in the adjacent storm water drain. This issue will continue to be monitored and evaluated.
- Ground water monitoring has been completed according to the schedule and protocol described in the Sampling Analysis Plan.
- Residual petroleum contamination likely remains in soils at the site. However, soils exceeding the cleanup level comply with cleanup standards since the long-term integrity of the containment system is ensured, and the requirements for containment technologies have been met.
- Institutional controls have been maintained and regularly evaluated at the time of each ground water sampling event. These controls continue to be effective in protecting public health and the environment by preventing exposure

to hazardous substances and maintaining the integrity of the cleanup actions.

- The recent redevelopment of the site into commercial office space is appropriate and protective of the institutional controls at the site. Construction plans do not include activities that would compromise the asphalt/concrete cap or otherwise create a risk of exposure to potentially impacted soils.

The cleanup actions at the site are performing as expected. Further periodic reviews are required as long as institutional controls are in place at the site.

Documents related to the cleanup are available for public review at:

- Ecology Eastern Regional Office, 4601 N. Monroe, Spokane WA 99205-1295. (Please call **Mrs. Johnnie Landis** at **509/329-3415** for an appointment.)

For more information or to submit written comments, please contact **Michael Boatsman**, Site Manager, at the Ecology address listed above or at **509/329-3492** or e-mail **Mboa461@ecy.wa.gov**.

THURSTON COUNTY

Budd Inlet Sediments Investigation, Olympia, Puget Sound Facility Site ID# 3097108

**Public comment period:
5/12/08 – 6/17/08**

Budd Inlet Sediments Investigation Final Report available for public review and comment.

Public Open House and Meeting: June 5, 2008

Ecology is providing an opportunity for public comment on the Budd Inlet Sediments Investigation Final Report. The harborwide investigation to determine the extent and possible sources of dioxin contamination of sediments in Budd Inlet began in April 2007. This report contains results of sediment sample dioxin analysis and the analysis to try to determine the source of dioxins. The report also outlines the next steps that will be taken in the investigation.

Budd Inlet is one of several Puget Sound bays being targeted for priority cleanup by the Puget Sound Initiative. Ecology is using special funding from this initiative to investigate sediment pollution and develop a strategy for cleaning up the Inlet.

A public meeting and open house will be held on June 5, 2008 at the Olympia Center (222 Columbia St NW, Olympia) in Room A. It will run from 6:30 –8:30 pm with a presentation at 7 pm.

The Investigation Final Report will be available for review from May 12 through June 17, 2008 at the following locations:

- Olympia Timberland Library, 313 8th Ave. SE, Olympia, WA 98501-9300
- Ecology Southwest Regional Office, 300 Desmond Drive, Lacey, WA 98504-7775. (Please call **360/407-6365** or e-mail **Dene461@ecy.wa.gov** for an appointment.)

- Ecology's website at http://www.ecy.wa.gov/programs/tcp/sites/budd_inlet/budd_inlet_hp.htm

For more information or to submit written comments, please contact **Rebecca Lawson**, Site Manager, at the Ecology address listed above or at **360/407-6241** or e-mail **Rlaw461@ecy.wa.gov**.

For more information about the public meeting or public involvement, please contact **Meg Bommarito**, Public Involvement Coordinator at **360/407-6255** or e-mail **Mbom461@ecy.wa.gov**.

INDEPENDENT CLEANUPS

A property owner may conduct an independent cleanup of contamination and submit reports to Ecology. When a property owner applies to Ecology for review of their independent cleanup, the site enters the Voluntary Cleanup Program. After review, Ecology sends a letter to the property owner stating either that additional work is required to be removed from the list of hazardous waste sites or that no further action is needed.

SITE HAZARD ASSESSMENTS

An initial investigation is conducted when a suspected release of hazardous materials has occurred. If additional work is required, a site hazard assessment may be conducted. These sites are ranked on a scale from 1 to 5, with 1 being the highest risk to human health and the environment. The following sites are scheduled for an assessment.

OTHER DEPARTMENT NOTICES

EIM (Environmental Information Management) Training

Ecology is now offering EIM training to the public free of charge at three locations across the state:

• Washington State Department of Ecology in Lacey, September 3rd 1-4pm & September 4th 1-4pm

• Yakima Valley Community College in Yakima, September 11th 2-5 pm

• Spokane Falls Community College in Spokane, September 12th 10 am -12 pm

EIM data entry is Required for all cleanup site environmental sampling. This includes:

- Enforcement Orders
- Agreed Orders
- Consent Decrees
- Permits
- Independent Remedial Actions, including the Voluntary Cleanup Program (VCP)
- Grants
- Contracts
- Interagency Agreements or Memoranda of Understanding
- Any other upland or sediment investigations and cleanups
- Any other sediment investigations and cleanups
- Any other sediment sampling, such as for dredging

This training will consist of setting up your personal EIM account, explanations of EIM submittal spreadsheets, uploading data into EIM, common problems, and time for questions/individual help.

To register for this training or if you have any additional questions please contact:

Jenna Durkee at Jedu461@ecy.wa.gov or 509/454-7865.
