

Proposed Removal from the Hazardous Sites List

Public Comment Invited

The Washington Department of Ecology plans to remove the Former Chevron Service Station DeTray cleanup site from the Hazardous Sites List (see below). This site was cleaned up under the Voluntary Cleanup Program (VCP). Under the VCP, property owners can clean up their own property to meet the requirements of the Model Toxics Control Act with technical assistance from Ecology. Ecology has reviewed the site cleanup activity and determined that

- The site is no longer a threat to human health or the environment.
- The cleanup actions at the site meet state cleanup standards.
- No further action is needed.

Background

The property, under several different owners, was used as a gas service station from 1970 to 2007. Site investigations revealed some soil and groundwater contamination from petroleum hydrocarbons and lead. Four underground storage tanks (USTs), pump islands and contaminated were removed in 1994. Property owners removed the second generation of USTs, dispenser islands and piping in 2007. Soil and groundwater testing after the 2007 activities revealed limited groundwater contamination by lead.

Groundwater has been monitored for contamination since that time. No contaminants have been found above state cleanup levels in recent groundwater samples. Ecology believes that this site can now be removed from the Hazardous Sites List

What Happens Next

The No Further Action Letter and the Final Groundwater Monitoring Report are now available for comment. Ecology will respond to your comments after the end of the comment period. Ecology may require further sampling or cleanup based on information given by the public. Otherwise, the site will be removed from the Hazardous Sites List after the comment period.

What is the Hazardous Sites List?

The Hazardous Sites List includes sites that have been assessed for their potential risk to human health and the environment. Sites are then ranked 1-5, based on the degree of risk, with 1 being the highest. **The Chevron DeTray site has a ranking of 2.**
