FORMAL CLEANUPS

Ecology oversees complex cleanup sites to ensure that your health and that of the environment are protected.

CLARK COUNTY

Astro Western Station 607 Site Facility Site ID# 69431927 CSID# 6528
13117 NE Highway 99, Vancouver

Public comment period: 8/21/14 – 9/22/14

Proposed Removal of Environmental Covenant and Draft Periodic Review Report
Ecology invites the public to comment on the decision to remove an environmental covenant from the Astro Western Station 607 cleanup site. A draft periodic review report is also available for review and comment.

Past activities polluted the site with gasoline-range petroleum hydrocarbons (TPH-G) in soil, and 1,2 Dichloroethane and benzene in groundwater. In 1996, the property owner cleaned up the site by removing soil and polluted groundwater.

Cleanup actions left about 11 cubic yards of contaminated soil in place. An environmental covenant was recorded for the site in 2009.

Based on a periodic review of the site, Ecology proposes removing the environmental covenant from the property because of the depth of remaining soil contamination, contamination is not present in groundwater, and current site conditions now meet a new TPH-G soil cleanup level.

Please direct questions to site manager Panjini Balaraju.

JEFFERSON COUNTY

Community Shell Site
11602 Rhody Drive, Port Hadlock

Facility Site ID# 2592766

CSID# 5290

Public comment period: 7/28/14 – 8/27/14

Periodic Review Report Available for Public Review and Comment

Ecology invites you to review and comment on a periodic review of the Community Shell cleanup site in Port Hadlock. Ecology reviews cleanup sites at least every five years to make sure they still protect human health and the environment.

Site studies show soil impacted by gasoline-range total petroleum hydrocarbons (TPH-G), benzene, toluene, ethylbenzene, xylenes (BTEX), and naphthalene. Groundwater is not contaminated. Between 2000 and 2008, roughly 800 tons of contaminated soils were removed from the site as part of cleanup. However, some contaminants still remain because they are too close to the building to remove or capped beneath the bordering Highway 19 and Irondale Drive.

An environmental covenant is in place that prohibits activities that could cause the release of remaining contamination. The covenant also calls for groundwater monitoring. Cleanup actions at this site appear to be protective.

Ecology will respond to comments at the end of the comment period. Ecology will do a new periodic review after another five years.

Please direct questions and comments to site manager Panjini Balaraju.

KING COUNTY

Metro Lake Union Site
1602 North Northlake Way, Seattle

Facility Site ID# 2217

CSID# 1275

Public comment period: 7/25/14 – 8/25/14

Periodic Review Report Available for Public Review and Comment

Ecology announces the periodic review report draft and public comment period for the Metro Lake Union site (also called the King County Metro Transit Facilities North and former Chevron Petroleum Bulk Terminal #100-1327). This site is located west of Gas Works Park and north of Lake Union in the Wallingford District.

The new periodic review draft is available for your review and comments. This is an opportunity for you to learn about the cleanup action at this Site and to send your comments to Ecology. The periodic review includes the new cleanup activities taking place this summer and review of the complete cleanup history from 1999 to present.

This site cleanup includes demolition and removal of the above-ground petroleum storage tanks and cleanup of petroleum in the subsurface soils and groundwater. To date, five different cleanup methods have been employed at the site and more than 90 percent of the contamination has been successfully removed.

This summer and fall, Metro and Chevron are cleaning up the last few pockets of petroleum contamination and this work may extend

into winter. Then Metro and Chevron will conduct compliance monitoring for an additional two years (five events) to confirm that the cleanup standards have been achieved and are sustained with Ecology oversight.

In addition to the Metro and Chevron cleanup work, Touchstone NLU LLC (Touchstone) purchased the North Yard, approximately one-half of the former Metro site. Touchstone entered a legal agreement with Ecology and agreed to conduct additional cleanup work at the North Yard. Touchstone will be testing and removing all contaminated soils within the North Yard from property line to property line.

Metro Transit and Chevron will begin new cleanup action using Dual-Phased Extraction to remove petroleum contamination at monitoring well MW-9 outside the North Yard property. Metro/Chevron will evaluate other pockets of petroleum outside of the Touchstone North Yard property line. If contamination is identified, then Metro/Chevron will conduct cleanup and confirmation testing. Metro/Chevron will conduct confirmation testing at former metal locations.

Finally, Metro/Chevron will continue groundwater compliance monitoring for the entire site during cleanup activities beginning July 2014 through 2015. They will continue groundwater compliance monitoring for five consecutive events from 2015 through 2017.

As new information becomes available, Ecology will add it to the Metro Lake Union site's webpage (see below).

Please direct questions and comments to site manager Maura O'Brien.

Site Manager: **Maura O'Brien**

Crowley Marine Services Inc. 8th Ave S Site
7400 8th Avenue South, Seattle

Facility Site ID# 1940187

CSID# 2520

Public comment period: 8/2/14 – 9/2/14

Interim Action Work Plan and Amended Agreed Order Available for Public Review and Comment

An interim action work plan and an amended agreed order for the Crowley Marine Services Inc. 8th Ave S site are available for public review and comment.

The property owners of the Crowley Marine Services 8th Avenue South cleanup site are proposing removal of contaminated soil in an area where construction is planned for a concrete slab with rail lines. A new property owner and the requirement to complete this interim action have been added to the original agreed order.

Myrtle Street Property Site **606 Myrtle Street, Seattle**

Facility Site ID# 12153465

CSID# 2819

Periodic Review Responsiveness Summary Available

A public comment period was held April 3 – May 5, 2014, for the periodic review of the Myrtle Street Property site.

A periodic review is conducted at least every five years after the initiation of a cleanup action at a site, as required by the Model Toxics Control Act (MTCA). The purposes of the review are to evaluate site conditions after cleanup is considered complete, and to ensure protection of human health and the environment.

Ecology received one comment during the comment period. This responsiveness summary documents the comment received and Ecology's responses. Some of the comments may not be relevant to the purpose of the periodic review and are policy-related issues. Those comments will be noted for further consideration by Ecology policy staff.

Please direct questions to site manager Eugene Freeman.

KLICKITAT COUNTY

Town Pump Gas Station Site
521 East Jewett Boulevard, White Salmon

Facility Site ID# 403

CSID# 4905

Public comment period: 8/7/14 – 9/8/14

Second Periodic Review Draft Report Available for Public Review and Comment

Ecology invites you to review and comment on a document called a periodic review for the Town Pump Gas Station site. A periodic review is conducted at least every five years after the initiation of a cleanup action at a site or property, as required by the Model Toxics Control Act (MTCA). The purposes of the review are to evaluate site conditions and to ensure continued protection of human health and the environment, when institutional controls are used as part of a remedy.

Ecology will review comments received during the comment period and make recommendations for suggested changes. The periodic review will become final if no significant changes are made. An additional public comment period will be held if significant changes are made.

Please direct questions and comments to periodic review coordinator Jeff Newschwander.

Periodic Review Coordinator: **Jeff Newschwander**
Central Regional Office
509/ 454-7842
Jeff.Newschwander@ecy.wa.gov

More information may be found on Ecology's Public Events Calendar: <http://www.ecy.wa.gov/>; click on calendar.

You may review the report at the following locations:

PEND OREILLE COUNTY

Airport Kwik Stop Site

Facility Site ID# 32584416

CSID# 4203

West of Highway 31 and north of Greenhouse Road, Ione

Public comment period: 7/28/14 – 8/26/14

Interim Actions Work Plan, State Environmental Policy Act and Determination of Non-Significance Available for Public Review
Ecology plans to conduct additional cleanup work called interim actions at the Airport Kwik Stop site beginning in August 2014. The public is invited to review and comment on the Work Plan, State Environmental Policy Act (SEPA), and Determination of Non-Significance (DNS) documents that will guide the cleanup work.

The site begins west of Highway 31 and north of Greenhouse Road and extends generally east and southeast toward the river in Ione. Investigations found contamination in soil and groundwater at the Airport Kwik Stop, beneath the Cabin Grill, and on several private properties northeast and southeast of the Cabin Grill. Current contaminants of concern include volatile organic compounds (VOCs), benzene, toluene, ethylbenzene and xylenes (BTEX), and gasoline range petroleum hydrocarbons (GRPH) in soil and groundwater.

The interim actions will remove petroleum gasoline product floating on top of the groundwater approximately 35 feet deep under the former Cabin Grill property. Soil borings will be drilled to collect soil and groundwater information near the Cabin Grill and downgradient of the Airport Kwik Stop. One, and possibly more than one, petroleum skimmer pump will be installed in the vicinity of the Cabin Grill.

Additional borings will be drilled near the existing Soil Vapor Extraction System (SVE) to establish soil remediation effectiveness when the SVE system performance indicates SVE soil remediation may be complete.

Potential impacts to humans and wildlife could occur if the contaminated groundwater plume rose to the surface in springs, seeps, or small ponds along the Pend Oreille River. Although Ecology has not found contamination in these areas, it is recommended that people avoid contact with these types of springs, seeps or ponds at this time.

Please direct questions and comments to site manager Doug Ladwig.

Site Manager: **Doug Ladwig**
Eastern Regional Office
509/ 329-3440
doug.ladwig@ecy.wa.gov

WHATCOM COUNTY

Georgia-Pacific West Site
Bellingham

Facility Site ID# 14

CSID# 2279

Public comment period: 7/14/14 – 8/27/14

Consent Decree, Cleanup Action Plan, Other Documents Available for Public Review
Ecology has prepared a cleanup action plan for the Georgia-Pacific West site on the Bellingham Bay waterfront. The plan is part of a legal agreement called a consent decree between Ecology and the Port of Bellingham.

Ecology is seeking comments on the consent decree and cleanup plan, along with a feasibility study, Determination of Non-Significance under the State Environmental Policy Act (SEPA), and draft public participation plan.

The plan addresses the pulp and tissue area of the Georgia-Pacific site, and calls for soil removal, soil capping, groundwater monitoring, and property use restrictions. A second feasibility study and cleanup plan will be developed for the chlor-alkali area in the future.

Please direct questions and comments to site manager Brian Sato.

Weldcraft Steel and Marine Cleanup Site
2652 Harbor Loop Drive, Bellingham

Facility Site ID# 29583133

CSID# 1785

Public comment period: 7/30/14 – 8/28/14

Remedial Investigation and Feasibility Study Report Available for Public Review and comment

Ecology is asking for comments on an environmental report for the Weldcraft Steel and Marine cleanup site located on Bellingham's waterfront at 2652 Harbor Loop Drive. The report includes an investigation of contamination at the site, called a remedial investigation, and a preferred alternative for cleaning up the site, called a feasibility study.

The investigation and evaluation of the site was conducted by the Port of Bellingham with Ecology oversight. It showed contamination in groundwater, soil, and sediments associated with past boatyard work. The preferred cleanup alternative calls for a combination of removal, containment, restricted use, and long-term monitoring of contaminants at the site.

Please direct questions and comments to site manager Mary O'Herron.

Site Manager: **Mary O'Herron**

WHITMAN COUNTY

North Colfax Petroleum Contamination Site

Facility Site ID# 4272

CSID# 11557

East side of North Main Street at intersection of East Tyler and East Harrison Streets, Colfax

Negotiations Underway for Consent Decree

Ecology began negotiations for a consent decree with the potentially liable persons (PLPs) for the North Colfax Petroleum Contamination Site on March 12, 2014. The PLPs include Convenience Retailers LLC; PetroSun West LLC; Bedrock Oil Inc.; TOC Holding Co.; Four Star Supply Inc.; and CHS Inc. Negotiations have been extended until the end of September 2014.

The consent decree is a draft document until public comment has been considered and modifications made, if appropriate. The decree is a legal document that formalizes the agreement between Ecology and the PLPs. It is used to implement work described in the cleanup action plan, which previously went through public comment. The decree also assures work is conducted in a timely manner, in accordance with state cleanup regulations, and that all other applicable laws and regulations are met.

The North Colfax Petroleum Contamination site is approximately 1,000 feet south of the Palouse River and east of the South Fork of the Palouse River. The site is made up of three main properties: the Colfax Grange property at 105 E. Harrison; the Cenex property bordered on the north by East Tyler, to the west by North Main Street, to the south by the railroad tracks and to the east by an unopened City of Colfax right-of-way; and the PetroSun/Time Oil property located at 804 N. Main.

The site includes several parcels, currently or previously occupied by gasoline stations. Petroleum leaks from operations at the site contaminated soil and groundwater requiring further investigations and development of cleanup options. Cleanup options have been chosen and the consent decree will implement the work.

Please direct questions to site manager Doug Ladwig.

CSID# 4941

Determination of No Further Action

Ecology has determined that no further action is necessary at the WA DOT Rimrock Maintenance Site 1 site. The site had petroleum contamination in soil and groundwater.

Please direct questions to site manager John Mefford.

Site Manager:

Public Records Coordinator
Central Regional Office
509/ 454-7658

CHELAN COUNTY

Chelan Public Works - Entiat Maintenance Shop Site
9486 Entiat River Road, Entiat

Facility Site ID# 62425225

CSID# 6397

Public comment period: 8/7/14 – 9/8/14

Second Periodic Review Draft Report Available for Public Review and Comment

Ecology invites you to review and comment on a document called a periodic review for the Chelan Public Works Entiat Maintenance Shop site. A periodic review is conducted at least every five years after the initiation of a cleanup action at a site or property, as required by the Model Toxics Control Act (MTCA). The purposes of the review are to evaluate site conditions and to ensure continued protection of human health and the environment, when institutional controls are used as part of a remedy.

Ecology will review comments received during the comment period and make recommendations for suggested changes. The periodic review will become final if no significant changes are made. An additional public comment period will be held if significant changes are made.

Please direct questions and comments to periodic review coordinator Jeff Newschwander.

GLOSSARY

Agreed order - A legal agreement with Ecology to make sure the cleanup meets the standards of Washington State's cleanup law, the Model Toxics Control Act (MTCA).

Cleanup action plan (CAP) - A document that describes the selected cleanup method(s) and specifies cleanup standards and other requirements. It is based on information and technical analyses generated during the RI/FS and consideration of public comments and community concerns. A draft of the CAP (DCAP) is made available for public review and comment before finalizing.

Comment period - A time period during which the public can review and comment on various documents and Ecology or EPA actions. For example, a comment period is provided to allow community members to review and comment on proposed cleanup action alternatives and proposed plans. Also, a comment period is held to allow community members to review and comment on draft feasibility studies.

Consent decree - A formal legal agreement that is filed with a court. It describes studies and/or cleanup work to be done at a site and the terms under which that work is to be done.

Engineering design report - Engineering design reports outline the specific details for implementation and operation of the first phase of the cleanup actions.

ERTS - Environmental Report Tracking System

Five-year periodic review - A periodic review is conducted at least every five years after the initiation of a cleanup action at a site, as required by the Model Toxics Control Act (MTCA). The purposes of the review are to evaluate site conditions, after cleanup is considered complete, and to ensure protection of human health and the environment.

Hazardous Sites List - A statewide list of contaminated properties. Ecology may remove a site from the list only after determining that all remedial actions except confirmational monitoring have been completed and compliance with the cleanup standards has been achieved at the site, or the listing was erroneous.

Independent cleanup action - Any remedial action without department oversight or approval and not under an order or decree.

LUST - Leaking Underground Storage Tank

NFA - No Further Action

Public participation plan - Outlines and describes the tools Ecology will use to inform the public about site activities, and it identifies opportunities for the community to become involved in this process.

PSI - Puget Sound Initiative

RCW - Revised Code of Washington

Remedial action - Construction work done to clean up a contaminated site.

Remedial investigation/feasibility study - Two distinct but related studies. They are usually performed at the same time, and together referred to as the "RI/FS."

Responsiveness summary - A summary of oral and/or written public comments received by Ecology during a comment period on key documents, and Ecology's responses to those comments.

RI/FS - See Remedial Investigation/Feasibility Study

SEPA - State Environmental Policy Act

Site Hazard Assessment (SHA) - An assessment to gather information about a site to confirm whether a release of hazardous substances has occurred and to enable Ecology to evaluate the relative potential hazard posed by the release.

UST - Underground Storage Tank

UXO - Unexploded Ordnance

Voluntary Cleanup Program (VCP) - The VCP is one of several options for cleaning up a hazardous waste site under the state's cleanup law. Under this option, property owners may perform a cleanup independently and request services from Ecology for a fee.

WAC - Washington Administrative Code

WARM, Washington Ranking Method - The method used to rank sites placed on the Hazardous Sites List.

Additional glossary terms may be found on the Ecology website at:
