FORMAL CLEANUPS

Ecology oversees complex cleanup sites to ensure that your health and that of the environment are protected.

CHELAN COUNTY

Wenatchee City Rotary Park Site Facility Site ID# 1584748 CSID# 836
1410 North Western Avenue, Wenatchee

Public comment period: 7/23/15 – 8/24/15

Second Periodic Review Draft Report Available for Public Review and Comment

Ecology invites you to review and comment on a document called a periodic review for the Wenatchee City Rotary Park site. A periodic review is conducted at least every five years after the initiation of a cleanup action at a site or property, as required by the Model Toxics Control Act (MTCA). The purposes of the review are to evaluate site conditions and to ensure continued protection of human health and the environment, when institutional controls are used as part of a remedy.

Ecology will review comments received during the comment period and make recommendations for suggested changes. The periodic review will become final if no significant changes are made. An additional public comment period will be held if significant changes are made.

Please direct questions and comments to periodic review coordinator Jeff Newschwander.

Periodic Review Coordinator: **Jeff Newschwander**

CLARK COUNTY

Former Alcoa Vancouver Aluminum Smelter Site
5701 NW Lower River Road, Vancouver

Facility Site ID# 21

CSID# 2867

Public comment period: 7/23/15 – 8/24/15

Periodic Review Available for Public Review and Comment

Ecology invites you to comment on a periodic review of post-cleanup conditions and monitoring data for the former Alcoa Vancouver site. It describes institutional controls and ongoing groundwater monitoring currently in place to protect human health and the environment.

The 208-acre former aluminum smelter is about 3 miles due west of Interstate 5 along the Columbia River in Vancouver. Aluminum production took place from 1940 to 1986. While cleanup at the site ended in 2010, soil and groundwater contamination remain. The Port of Vancouver currently owns the site.

Please direct questions and comments to site manager Guy Barrett.

Site Manager: **Guy Barrett**
Industrial Section

- Vancouver Community Library – 901 C St., Vancouver, WA. Call 360/ 906-5106.
- Ecology's Industrial Section – 300 Desmond Drive SE, Lacey, WA. (Please contact Ann Lowe for an appointment at 360/ 407-6916 or Ann.Lowe@ecy.wa.gov.)

COWLITZ COUNTY

Weyerhaeuser Chlor Alkali Plant Site
3451 Industrial Way, Longview

Facility Site ID# 28

CSID# 2272

Public comment period: 7/23/15 – 8/24/15

Periodic Review Available for Public Review and Comment

Ecology invites you to comment on a periodic review of post-cleanup conditions and monitoring data for the Weyerhaeuser Chlor Alkali Plant site. It describes institutional controls and ongoing groundwater monitoring currently in place to protect human health and the environment.

The 38.5 acre Weyerhaeuser Chlor Alkali Plant is located on the north shore of the Columbia River, about 2 miles southwest of the city of Longview, in Cowlitz County in southwest Washington. The site produced chlorine and sodium hydroxide for use by the pulp and paper industry from 1958 to March 1999. While cleanup at the site ended in 2003, soil and groundwater contamination remain. Under a 2004 compliance monitoring plan, Weyerhaeuser continues to conduct groundwater monitoring on a periodic basis. Axiall Corporation currently operates the Eagle US2 plant on this site.

Please direct questions and comments to site manager Guy Barrett.

Site Manager: **Guy Barrett**

- Longview Public Library – 1600 Louisiana St., Longview, WA. Call 360/ 442-5300.
- Ecology's Industrial Section – 300 Desmond Drive SE, Lacey, WA. (Please contact Ann Lowe for an appointment at 360/ 407-6916 or Ann.Lowe@ecy.wa.gov.)

GRAYS HARBOR COUNTY

Weyerhaeuser Sawmill Aberdeen Site
500 North Custer Street, Aberdeen

Facility Site ID# 1126

CSID# 4987

Public comment period: 6/25/15 – 7/27/15

Agreed Order Available for Public Review and Comment

Ecology invites the public to comment on a proposed agreed order for the Weyerhaeuser Sawmill Aberdeen cleanup site. Grays Harbor Historical Seaport Authority (GHHS) bought the former mill site from Weyerhaeuser in 2013. The agreed order is requiring GHHS to conduct an investigation of the state-owned tidelands adjacent to the property.

KING COUNTY

PSC/Stericycle-Kent Facility Site
20245 77th Avenue South, Kent

Facility Site ID# 70726415

CSID# 12484

Public comment period: 7/13/15 – 9/14/15

Public meeting: 7/29/15 – 5 p.m., Stericycle-Kent Regional Office, 18000 72nd Ave. S, Ste. 217, Kent

Permit Modification Available for Public Review and Comment

Ecology welcomes comments on a draft dangerous waste permit modification for the Stericycle-Kent facility, formerly known as PSC-Kent.

Burlington Environmental LLC is the legal owner of the facility and is a wholly-owned subsidiary of PSC Environmental Services LLC, which is a wholly-owned subsidiary of Stericycle Environmental Solutions Inc.

Stericycle modified the dangerous waste (DW) permit for its facility in Kent. In accordance with WAC 173-303-830, the change is a Class 2 modification requiring Ecology’s approval.

Stericycle has submitted a proposal to revise Parts A and B of the Stericycle-Kent facility DW permit to Ecology. These changes reflect construction upgrades and the proposed relocation of various operations to the Stericycle Tacoma facility. New construction will include firewalls, an expanded South Dock, and a concrete driving surface between the South Dock and the warehouse.

Several units will be removed from DW service. These include the South Check-In Area, Lab Pack Area, Lab Pack Container Storage Area, North and South Container Storage Areas, Central Process Area, and Solidification Process Area. No changes will be made to DW tank-related activities.

The modification also describes a change in facility name from “PSC-Kent” to “Stericycle-Kent.”

A public meeting will be held on July 29, 2015, at 5 p.m. at the Stericycle-Kent Regional Office, 18000 72nd Ave. S, Ste. 217, Kent.

Ecology will review to all comments before making a final decision. Please direct questions and comments to Pallavi Mukerjee.

Touchstone North Lake Union Site
3301 Densmore Ave. N, Seattle

Facility Site ID# 2217

CSID# 1275

Public comment period: 7/17/15 – 8/17/15

Documents Related to Prospective Purchaser Consent Decree Available for Public Review and Comment

Touchstone North Lake Union (North site), the North Yard portion of the former Metro Lake Union site, is located at 3301 Densmore Ave. N in Seattle. In 2007, Touchstone entered a legal agreement with Ecology called a prospective purchaser consent decree (PPCD) to define Touchstone's cleanup actions if it purchased the North site. The North site was purchased in 2009. It is the former Metro Lake Union North Yard, approximately one-half of the Metro Lake Union site, and the former Chevron Bulk Petroleum Terminal #100-1327 site at 1602 N Northlake Way, Seattle.

Touchstone has performed the cleanup actions for the North site as required by the PPCD. The petroleum contaminated soils were removed for off-site treatment and/or disposal at an approved facility. Post-excavation soil testing showed all known petroleum soils have been removed from the North site and that remaining soil meets cleanup levels for unrestricted land use.

The North site cleanup actions and post-excavation soil testing results are described in a remediation action report. This site has an environmental restriction limiting groundwater use at the property. Ecology proposes to approve the report and to issue a determination that the requirements of the PPCD have been satisfactorily completed. Ecology invites comments on the following:

- A remediation action report by Associated Earth Sciences Inc. (AESI) dated March 20, 2015.
- Ecology proposal to issue a written notification that the requirements of the PPCD have been satisfactorily completed and to dismiss the prospective purchaser consent decree No. 07-2-23870-1SEA with Cleanup Action Plan-Touchstone NLU LLC North site.

LEWIS COUNTY

Centralia Landfill Site
1411 South Tower Road, Centralia

Facility Site ID# 1154

CSID# 2657

Public comment period: 7/9/15 – 8/10/15

Periodic Review Available for Public Review and Comment

Ecology invites you to review and comment on a periodic review for the Centralia Landfill cleanup site. Ecology reviews cleanup sites at least every five years to make sure they still protect human health and the environment.

The site operated as an unlined landfill from 1958 to 1994. In 1994, a cover was placed on the landfill. Based on the 2015 site visit, Ecology determined that the landfill cover and remedial actions continue to protect human health and the environment.

Please direct questions and comments and site manager Panjini Balaraju.

Site Manager: **Panjini Balaraju**

PIERCE COUNTY

Bunce U Rent Site
1812 E Main Ave, Puyallup

Facility Site ID# 81519845

CSID# 6700

Public comment period: 6/25/15 – 7/27/15

Periodic Review Available for Public Review and Comment

Ecology invites the public to comment on a consent decree amendment and draft periodic review report for the Bunce U Rent cleanup site. Ecology reviews cleanup sites every five years to make sure they still protect human health and the environment.

Underground storage tanks contaminated site soil and groundwater with petroleum. The tanks were removed in 1998 and the site was cleaned up. Some contamination remains on site. This soil is capped and an environmental covenant prohibits activities that could disturb it.

Based on the 2015 site visit, Ecology determined that the asphalt cap continues to eliminate direct exposure to contamination. No groundwater contamination was detected in the 2014 testing.

Please direct questions and comments to site manager Panjini Balaraju.

Franko Oil Co Site
4801 South Park Ave, Tacoma

Facility Site ID# 87358125

CSID# 6796

Public comment period: 7/9/15 – 8/10/15

Periodic Review Available for Public Review and Comment

Ecology invites you to review and comment on a periodic review for the Franko Oil Co. cleanup site. Ecology reviews cleanup sites at least every five years to make sure they still protect human health and the environment.

In the past, the site stored and supplied fuel. The site was cleaned up in 2005. Structures were removed along with 2,153 tons of polluted soil. The site is now a City of Tacoma park.

Based on the 2015 site visit, Ecology determined that the remedial actions continue to protect human health and the environment.

Please direct questions and comments to site manager Panjini Balaraju.

USG Highway 99 Site
7110 Pacific Highway East, Milton

Facility Site ID# 84531356

CSID# 3618

Public comment period: 7/9/15 – 8/11/15

Draft Site Reports, Cleanup Action Plan, Agreed Order, and State Environmental Policy Act Determination Available for Comment
Ecology invites the public to comment on draft cleanup plans, an agreed order, and a State Environmental Policy Act (SEPA) review for the USG Highway 99 cleanup site. Site groundwater, soil, and sediment are contaminated with arsenic. Under the proposed cleanup plans USG will:

- Remove contaminated sediments from Hylebos Creek.
- Solidify arsenic in soil and treat contaminated groundwater with a method called in-situ chemical oxidation.
- Monitor to make sure arsenic levels decline naturally.
- Apply land-use controls and/or groundwater-use restrictions for the site properties. This would be done through an environmental covenant.

The following draft documents are available for public review and comment:

- Agreed order
- Draft cleanup action plan (CAP)
- State Environmental Policy Act (SEPA) review
- Remedial investigation/feasibility study (RI/FS) report
- Updated public participation plan

Please direct questions and comments to site manager Jason Landskron.

Stericycle-Tacoma Site
1701 Alexander Ave., Tacoma

Facility Site ID# 87358125

CSID# 6796

Public comment period: 6/30/15 – 8/31/15

Public meeting: 6 p.m. 7/29/15, Stericycle-Kent Regional Office, 18000 72nd Ave. S, Suite 217, Kent

Permit Modification Available for Public Review and Comment

Ecology welcomes comments on a draft dangerous waste permit modification for the Stericycle-Tacoma facility, formerly known as PSC-Tacoma.

Burlington Environmental LLC is the legal owner of the facility and is a wholly-owned subsidiary of PSC Environmental Services LLC which is a wholly-owned subsidiary of Stericycle Environmental Solutions Inc. Stericycle modified the dangerous waste (DW) permit for its facility in Tacoma. In accordance with WAC 173-303-830, the change is a Class 2 modification requiring Ecology's approval. This modification revises Parts A and B of the Stericycle-Tacoma facility DW permit. It now reflects construction and operational changes to accommodate the proposed relocation of various operations from the Stericycle-Kent facility to the Stericycle-Tacoma facility.

New DW units will include the main truck dock, main check-in area, process area #1, process area #2, and the Lab Pack Building. Container management activities at the Tacoma facility will remain within previously approved capacity limits established in a prior permit. No changes will be made to tank-related waste management activities. The modification also describes a change in facility name from "PSC-Tacoma" to "Stericycle-Tacoma."

A public meeting will be held on July 29, 2015, at 6 p.m. at the Stericycle-Kent Regional Office, 18000 72nd Ave. S, Suite 217, Kent.

Ecology will review to all comments before making a final decision. Please direct questions and comments to Pallavi Mukerjee.

SKAGIT COUNTY

Georgia Pacific Corp Clear Lake Site
12827 South Front Street, Clear Lake

Facility Site ID# 2733

CSID# 4297

Public comment period: 7/24/15 – 8/13/15

Proposed Removal of Environmental Covenant

Ecology proposes to remove the environmental covenant from the property associated with the Georgia Pacific Corp Clear Lake site. The site is approximately 5.6 acres of land located at 12827 S. Front St. in Clear Lake (Skagit County Assessor's Parcel: P23293). The environmental covenant was recorded for the property in 2004.

The property was used by the Georgia Pacific Corporation for silviculture operations from approximately 1980 to 2000 and included storage and use of chlordane pesticide. During the early 1990s, the property owner began conducting an environmental investigation on the property that detected petroleum hydrocarbons in soil and chlordane in soil and groundwater above the state's cleanup standards.

The site was cleaned up under Ecology's Voluntary Cleanup Program (VCP). Under the VCP, property owners clean up their property with technical assistance and regulatory review from Ecology. During the VCP cleanup process, Ecology required that the environmental covenant be recorded for the property to restrict the use of groundwater for the protection of human health and the environment.

In the early 1990s, cleanup work conducted on the property included the removal of the above ground and underground petroleum storage tanks, excavating and removing approximately 300 tons of chlordane and petroleum contaminated soil. The groundwater has been tested periodically since 1995. Testing of both groundwater and soil on the property now show this site is in compliance with state cleanup standards.

If the cleanup meets the state cleanup standards under the Model Toxics Control Act, Washington's cleanup law, Ecology will issue a "no further action" determination at the completion of the cleanup. Accordingly, Ecology is proposing to remove the environmental covenant.

SNOHOMISH COUNTY

East Waterway Site Facility Site ID# 2733 CSID# 4297
Generally located in the Everett Harbor area, south of the U.S. Naval Station, Everett

Public comment period: 6/30/15 – 7/30/15

Interim Action Plan Available for Public Review and Comment

Ecology invites you to review and comment on the draft agreed order and the draft public participation plan for the East Waterway site in Everett. This order addresses cleanup of marine sediments and upland sources in the East Waterway area of Port Gardner Bay, located off shore from the US Naval Station and the former Kimberly-Clark Worldwide pulp and paper mill.

The draft agreed order is a legal agreement between Ecology and the potentially liable persons – Kimberly-Clark Worldwide Inc., the Port of Everett and the Washington Department of Natural Resources – to provide remedial cleanup action at the site. The public participation plan describes how the public can provide input on the cleanup of the site.

Ecology staff held a public meeting on July 14 in the Mt. Baker Room at Everett Station, 3201 Smith Ave., to give people an opportunity to ask questions and talk with Ecology staff.

Please direct questions and comments to site manager Andrew Kallus.

SPOKANE COUNTY

Grain Handling Facility at Freeman Site
S 14603 Highway 27, Freeman

Facility Site ID# 77319379

CSID# 12540

Negotiations Starting for Agreed Order

Ecology’s Toxics Cleanup Program will begin negotiations June 25, 2015, for 60 days with Union Pacific Railroad and Cenex Harvest States. The negotiations are for an agreed order requiring Union Pacific Railroad and Cenex Harvest States to conduct a remedial investigation and feasibility study at the Grain Handling Facility at Freeman.

The remedial investigation will provide answers about contaminants in soil and groundwater, determine sources of the carbon tetrachloride and any other contaminants, and define where contamination is located at the site. The feasibility study will identify and evaluate the best methods to clean up the contamination.

Please direct questions to site manager Patrick Cabbage.

Manito Shopping Center Site
802 East 29th Avenue, Spokane

Facility Site ID# 9406814

CSID# 1654

Public comment period: 7/9/15 – 8/7/15

Periodic Review Available for Public Review and Comment

You are invited to review and comment on a document called a periodic review for the Manito Shopping Center site. A periodic review is conducted at least every five years after the initiation of a cleanup action at a site, as required by the Model toxics Control Act (MTCA). The purposes of the review are to evaluate site conditions after cleanup is considered complete, and to ensure continued protection of human health and the environment.

The site consists of two parcels. The majority of the site includes a shopping center parking lot and a small portion of the site extends under the commercial building. The businesses include the Manito Tap House, Ross Dress for Less, Republic Pi Pizza, US Bank, and Chase Bank located adjacent to the parking area on the north and east of the site. Washington Trust Bank is on adjacent property to the south.

Contaminants of concern in soil included, tetrachloroethene (PCE), trichloroethene (TCE), chloromethane, PAHs and cPAHs. Additional contaminants were detected but were below levels of concern according to state standards.

Groundwater monitoring for five consecutive quarters through April 2009 indicated there is no contaminated groundwater at the site.

Since limited amounts of cPAHs and solvents remain in soil at levels that do not meet state standards, a covenant was placed on the property to limit how it may be used. The restrictions also limits activities that might interfere with the integrity of the cleanup work completed at the site or create an exposure to humans or the environment.

A site visit was conducted January 21, 2015, and Ecology determined the following based on the periodic review:

- The cleanup actions are protective of human health and the environment.
- Soil cleanup levels have not been met, but the cleanup action complies with WAC 173-340-740(6)(f) since the long-term integrity of the containment system is ensured and the requirements for containment technologies have been met.
- The covenant for the property is in place and will protect public health and the environment from exposure to hazardous substances and protecting the integrity of the cleanup action.
- No additional remedial actions are required.

Ecology will review all comments received during the comment period and make changes to the periodic review, if appropriate. If no significant changes are made, the review will be finalized. If significant changes are made, no additional public comment period will be held.

THURSTON COUNTY

BP Station 03158 Site
501 Trosper Road, Tumwater

Facility Site ID# 69587682

CSID# 7115

Public comment period: 6/29/15 – 7/30/15

Site Proposed for Removal from Hazardous Sites List

Ecology invites the public to comment on the decision to remove the BP Station 03158 site from the Hazardous Sites List. The property owner removed petroleum-contaminated soil and used a vapor extraction system to remove 1,091 pounds of contamination.

Follow-up sampling did not find contamination above cleanup levels in soil or groundwater. Ecology considers the cleanup complete. The site was cleaned up under the Voluntary Cleanup Program.

East Bay Redevelopment Site
315 Jefferson Street NE, Olympia

Facility Site ID# 5785176

CSID# 407

Deadline Extended

Ecology has agreed to extend the deadline for the submittal of the remedial investigation and feasibility study (RI/FS) report and draft cleanup action plan (CAP) for the East Bay Redevelopment site. The new deadline for the submittal of the RI/FS report and draft CAP is no later than August 14, 2015.

Historic timber-related industries caused soil and groundwater contamination. Total petroleum hydrocarbons (TPHs), carcinogenic polycyclic aromatic hydrocarbons, dioxins and furans, and metals were detected above state cleanup levels in soil. Investigations also revealed TPHs and metals in groundwater above state cleanup levels or screening levels.

Please direct questions to site manager Steve Teel.

NEWS & NOTES

Guidelines revised for cleanups done under VCP

Ecology has revised Publication 08-09-044, "Guidelines for Property Cleanups under the Voluntary Cleanup Program (VCP)." The guidelines explain how to clean up a property within a larger contaminated site under the VCP. The revisions:

- Correct an error in the description of Figure 3-8 (Section 3.6, Example #2).
- Clarify what type of remedial action work requires a license (Section 5.1.3.3).

If you have any questions, contact statewide VCP coordinator Nnamdi Madakor at 360-407-7244 or Nnamdi.Madakor@ecy.wa.gov.

GLOSSARY

Agreed order - A legal agreement with Ecology to make sure the cleanup meets the standards of Washington State's cleanup law, the Model Toxics Control Act (MTCA).

Cleanup action plan (CAP) - A document that describes the selected cleanup method(s) and specifies cleanup standards and other requirements. It is based on information and technical analyses generated during the RI/FS and consideration of public comments and community concerns. A draft of the CAP (DCAP) is made available for public review and comment before finalizing.

Comment period - A time period during which the public can review and comment on various documents and Ecology or EPA actions. For example, a comment period is provided to allow community members to review and comment on proposed cleanup action alternatives and proposed plans. Also, a comment period is held to allow community members to review and comment on draft feasibility studies.

Consent decree - A formal legal agreement that is filed with a court. It describes studies and/or cleanup work to be done at a site and the terms under which that work is to be done.

Engineering design report - Engineering design reports outline the specific details for implementation and operation of the first phase of the cleanup actions.

ERTS - Environmental Report Tracking System

Five-year periodic review - A periodic review is conducted at least every five years after the initiation of a cleanup action at a site, as required by the Model Toxics Control Act (MTCA). The purposes of the review are to evaluate site conditions, after cleanup is considered complete, and to ensure protection of human health and the environment.

Hazardous Sites List - A statewide list of contaminated properties. Ecology may remove a site from the list only after determining that all remedial actions except confirmational monitoring have been completed and compliance with the cleanup standards has been achieved at the site, or the listing was erroneous.

Independent cleanup action - Any remedial action without department oversight or approval and not under an order or decree.

LUST - Leaking Underground Storage Tank

NFA - No Further Action

Public participation plan - Outlines and describes the tools Ecology will use to inform the public about site activities, and it identifies opportunities for the community to become involved in this process.

PSI - Puget Sound Initiative

RCW - Revised Code of Washington

Remedial action - Construction work done to clean up a contaminated site.

Remedial investigation/feasibility study - Two distinct but related studies. They are usually performed at the same time, and together referred to as the "RI/FS."

RI/FS - See Remedial Investigation/Feasibility Study

SEPA - State Environmental Policy Act

Site Hazard Assessment (SHA) - An assessment to gather information about a site to confirm whether a release of hazardous substances has occurred and to enable Ecology to evaluate the relative potential hazard posed by the release.

UXO - Unexploded Ordnance

Voluntary Cleanup Program (VCP) - The VCP is one of several options for cleaning up a hazardous waste site under the state's cleanup law. Under this option, property owners may perform a cleanup independently and request services from Ecology for a fee.

WAC - Washington Administrative Code

WARM, Washington Ranking Method - The method used to rank sites placed on the Hazardous Sites List.

Additional glossary terms may be found on the Ecology website at:

http://www.ecy.wa.gov/programs/tcp/tcp_acronym_list.htm
