TO: Merley McCall, Tom Haggarty

DATE: December 16, 1969

FROM: Ron Lee 

SUBJECT: Forest Products Inc., Peshastin

On November 19, 1969, I examined the debarker effluent settling pond facility at Forest Products Inc., Peshastin. The pond is periodically dredged (every 3-4 months) and appeared to be in good condition. The reduction in COD, BOD, and solids reflects the treatment achieved in the settling pond (Table 1).

Table 1.

Sample	COD ppm	BOD ppm	pH	Conductivity μ mhos/cm	Solids		Suspended	
					Total ppm	Nonvolatile ppm	Total ppm	Nonvolatile ppm
Pond influent (debarker effluent)	1280	>545	7.2	247	1390	312	79	16
Pond effluent	80	21	6.8	90	138	64	38	10
