

April 8, 1974

Memo to: Rhys Sterling

From: Pat Lee

Subject: Hygrade Food Products

The Investigation's Section of the Department of Ecology was requested to conduct a survey on Hygrade Food Products, 707 North Regal Street in Spokane. Upon visual inspection of their waste treatment facilities, I was informed that the City of Spokane routinely composites the Company's effluent on a 24 hour basis. Rather than duplicate their effort and after consultation with John Arnquist, a decision was made to cancel our survey and transmit the City of Spokane's results to you. The results were as follows:

Date -	3-28-73	6-14-73	8-21-73	8-21-73	8-22-73	10-5-73
Sampling - Times	0900-1600	0800-1500	1200-2000	2000-0400	0400-1200	1200-1200
Parameters*						
pH	6.8	7.9	8.0	7.7	7.7	7.9
BOD	2,590	1,100	155	360	450	280
COD	2,760	2,170	375	755	715	475
Sus. Solids	528	586	127	195	152	118
PO ₄ -P	22.0	12.2	2.1	4.5	2.5	2.0

*All results are in ppm except pH.
