

Application for Automotive Repair Business Inclusion in the Emission Check Program

Western Washington (800) 272-3780

Eastern Washington (509) 329-3491

I agree to the following:

- My business name, address, and phone number will be on the list given to drivers whose vehicles fail an Emission Check test.
- Only an Ecology-Authorized Emission Specialist will perform appropriate emission-related diagnoses, repairs, and/or adjustments of vehicles that fail an Emission Check test.
- An Ecology-Authorized Emission Specialist must sign and date the customer's repair receipt. The repair receipt must list the emission diagnosis or repairs done, and those that may be needed for the vehicle to pass the test or be waived.
- No employee will tamper or help tamper with emission control systems, including adjusting a vehicle outside the manufacturer's specifications; or get or help get a false passing test, waiver, or exemption from the test requirement.
- My business must immediately stop listing (print, web, verbal) itself as an authorized repair business if it no longer meets the requirements.
- Notify Ecology when an Authorized Emission Specialist starts or ends working at my business.
- Allow Ecology staff access to my business, including diagnostic equipment, personnel, and records, during my business's normal business hours.
